Il progetto è stato
realizzato come
conclusione del percorso di
stage nell'azienda

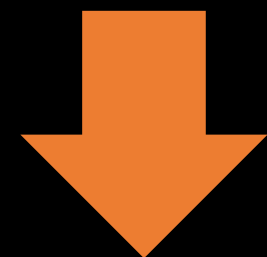

Nasce con lo scopo
di studiare gli **embedding**

Come funzionano?

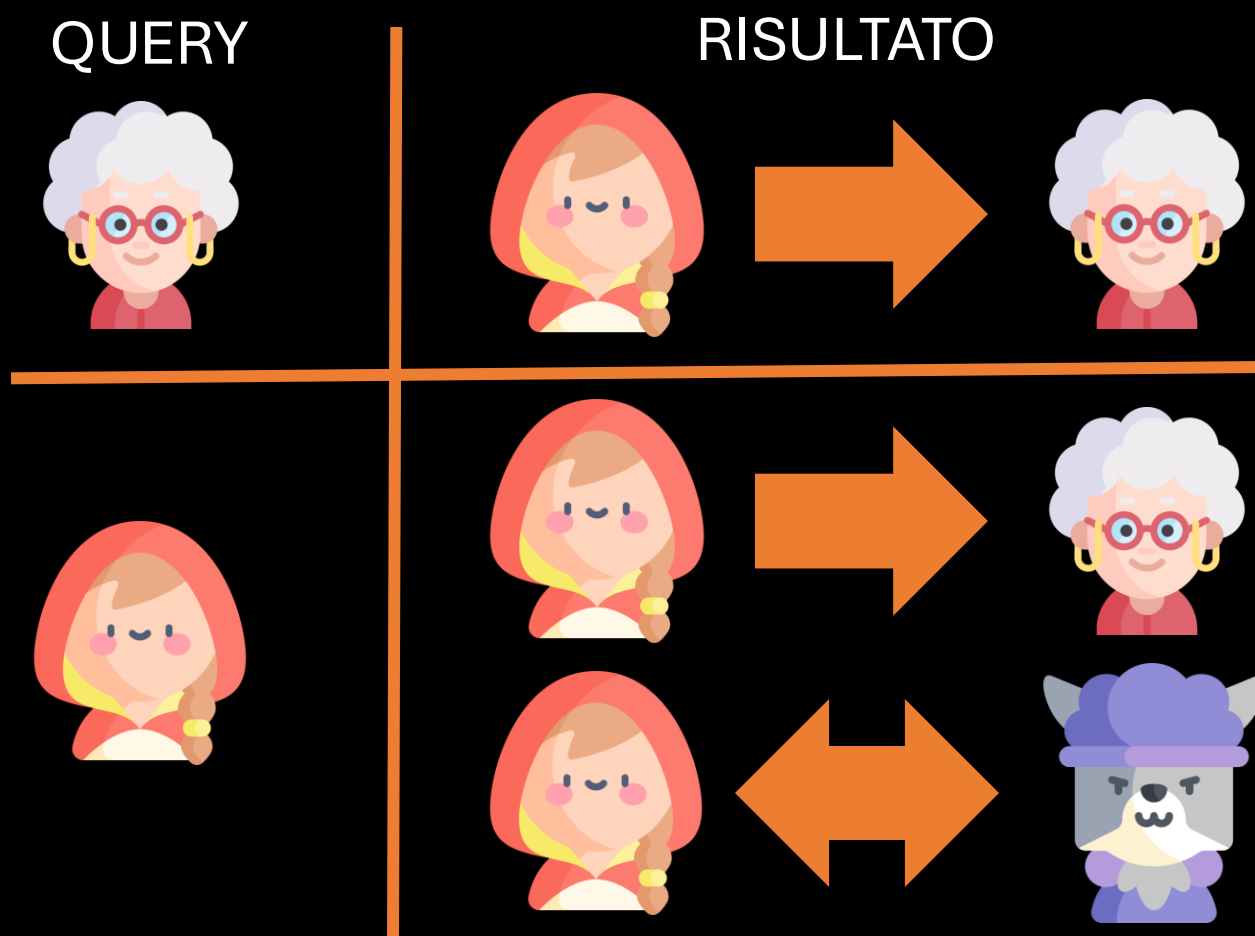

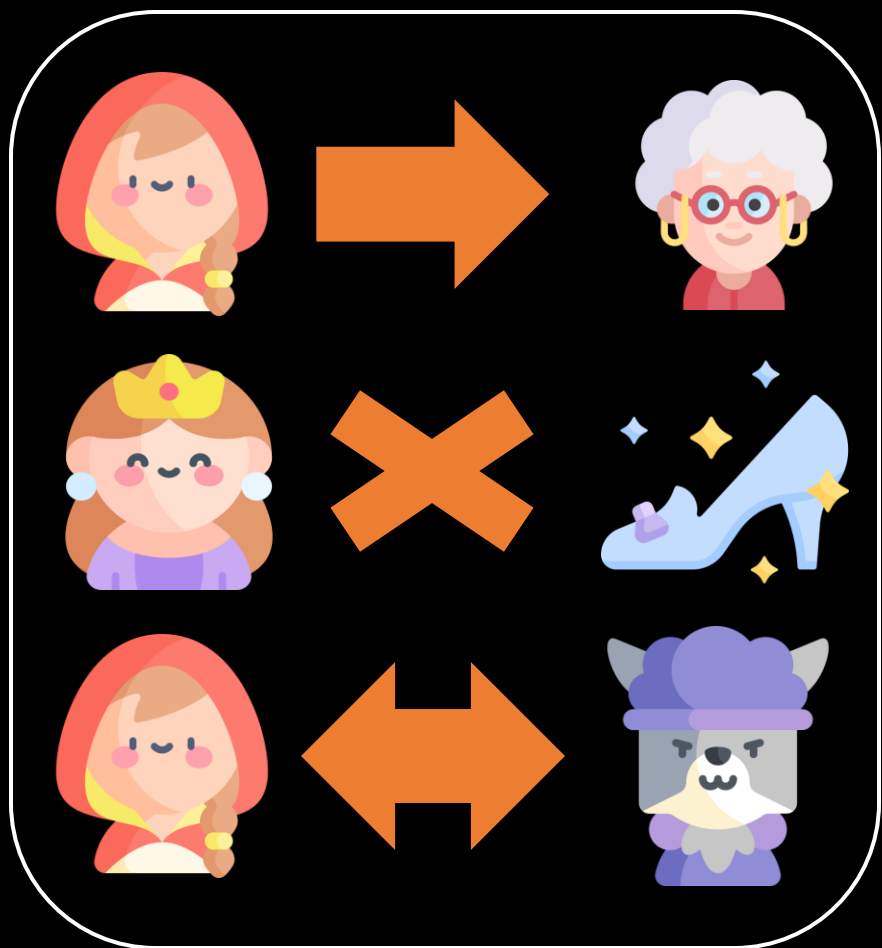

MODELLO

$(0, 1, 2, 3, 4, \dots, 1)$

Come funzionano?

Tramite la trasformazioni in vettori, ricercherà l'embedding più simile

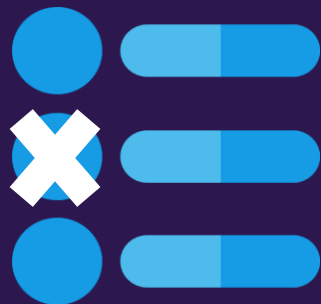

Che cosa fa?

Web Scraping

Estrazione di informazioni pulite e ordinate da una pagina web

Inserimento
argomento

Selezione
url

Web
Scraping

[1,2,3,4,5]

Generazione
Embedding

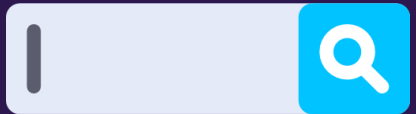

Salvataggio
DB vettoriale

Che cosa fa?

Query

Data una domanda, otteniamo le frasi più inerenti presenti nel DB

Inserimento
